UDOT's 800 North Project

As current utility work along 800 North continues, the Utah Department of Transportation (UDOT) will soon begin widening 800 North in Orem (S.R. 52) to six lanes: three travel lanes in each direction with a raised center median from 400 West to 1000 East.

The 800 North project has progressed through an environmental study and an intensive design process. During this time, UDOT has worked with other partner agencies, community leaders, property owners and the general public in planning for an improved roadway with the following benefits:

- Improved traffic flow and reduced congestion
- Improved air quality by reducing stop-and-go traffic
- Community beautification along the 800 North corridor with a landscaped pedestrian parkway
- Enlarged shoulder widths for vehicles to pull in and out of traffic
- Improved safety by closing the accesses to 800 North at 50 West, 350 East, and 700 East

Meet the Contractor: Condie Construction

UDOT has selected Condie Construction Company, Inc. as the general contractor for the 800 North Project. Condie Construction, established in 1983, is a general engineering construction company specializing in infrastructure installation, with projects ranging in size from \$500,000 to \$37,000,000. Condie

is a local company, based out of Springville, and is known for its strong agency relationships with an emphasis on building a quality project on budget and on time.

Todd Andrus will be Condie's project manager, with Dave Martindale the on-site project superintendent.

Anticipated Construction Schedule and Impacts

UDOT and Condie Construction are still finalizing details with regard to schedule, approach and phasing of construction activities. That said, the information below provides a general outline of construction activities, with expected milestones and impacts.

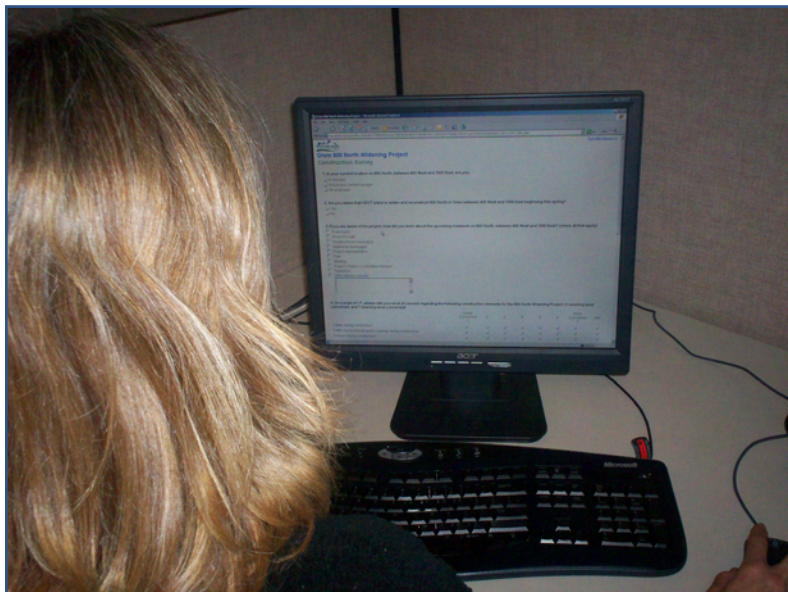

- **May 2007 - Fall 2007**
 - Construction on north side of 800 North, including sound wall
 - Construction activities will be focused on the west end first
 - Utility relocation and installation
 - North side planned for completion by winter
- **Winter 2007 - Spring 2008**
 - Utility and irrigation work continue
- **Spring 2008 - Fall 2008**
 - Construction on south side of 800 North
 - Project planned for completion by fall 2008
- **General Anticipated Construction Impacts**
 - Generally, two lanes will be maintained in each direction along 800 North
 - Temporary side street/driveway closures will be required; advance notification will be provided
 - Business access will be maintained and marked, with any detours clearly posted

To stay up to date on weekly plans, visit the project Web site, www.udot.utah.gov/oreem800north, to review the latest information. You can also request regular email updates at the project site or by emailing the project team at jsmart@langdongroupinc.com.

800 North Project Survey

UDOT is interested in hearing from you regarding the 800 North Project. An Internet survey is available where you can share your knowledge of the project, tell us any concerns you might have about upcoming construction activities, and let us know what methods to use to keep you informed about project schedules and impacts.

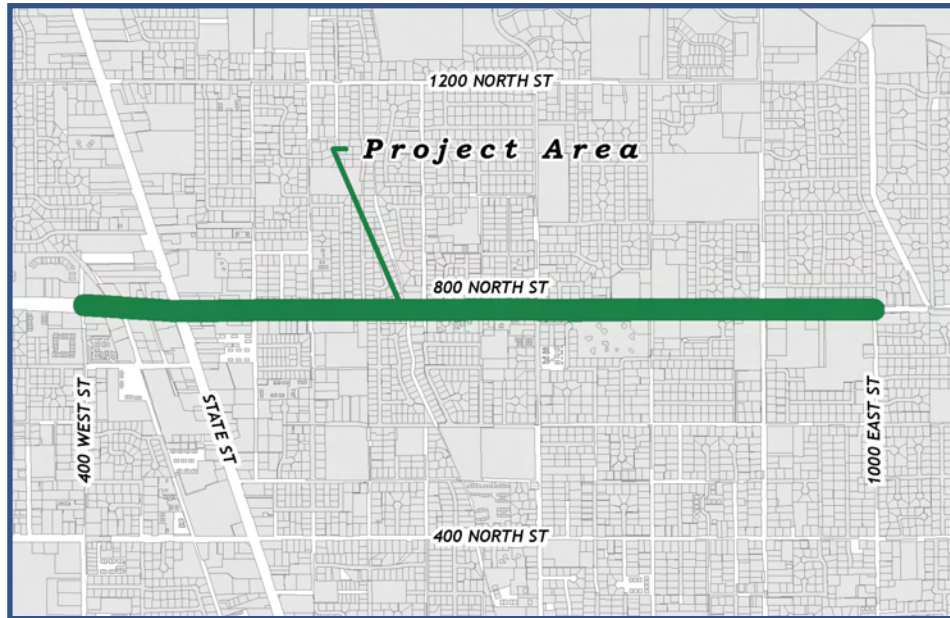

Please take a few moments to provide your feedback to our public information team. The survey can be accessed online by visiting the 800 North Project Web site, www.udot.utah.gov/oreem800north, and clicking on the survey link. If you would rather participate in the survey by mail, call 801-360-4944 to request a hard copy.

The survey will be available online and by request through **May 31**. If you have questions about or have difficulty accessing the survey, please call 801-360-4944.

800 North Project Area

The 800 North Widening Project will span from 400 West to 1000 East.

Other Area Projects

As you are well aware, Utah's narrow construction season requires a great deal of work to take place simultaneously. Below are a few of the projects happening in the area of the 800 North project, including resources to find more information for each. Many of the projects are coordinating closely to reduce overall impacts to the public and to expedite construction activities where possible.

Other 800 North Construction - In addition to the planned expansion work for the 800 North widening, which includes signal relocations and additional utility work, several projects have been underway and will continue in conjunction with the UDOT 800 North work. Details regarding the below 800 North projects can be found at www.udot.utah.gov/orem800north.

- **Central Utah Water Conservancy District** - Ongoing since late 2006, CUWCD is installing a 36" water line to serve the future water needs of Utah County. The line is being installed in the same project area as the 800 North Project. This work is expected to last through May.
- **Questar Gas** - In conjunction with the CUWCD work, Questar Gas has been installing a 24" high-pressure gas line. The two agencies have closely coordinated their work to reduce construction time and impacts. This work is also expected to last through May, but other gas line work will take place during the 800 North Project.
- **800 North and 400 West Signal** - UDOT plans to construct a new traffic signal at 400 West and 800 North this summer in conjunction with the 800 North widening project.

Provo Canyon - The reconstruction of U.S. 189 through Provo Canyon continues this season. By the end of the year, UDOT anticipates opening traffic to four lanes with some additional pavement work planned for next season. To stay updated on this significant project, visit www.udot.utah.gov/provo-canyon.

Orem 1600 North - The City of Orem is reconstructing 1600 North at State Street. This work is expected to last through May. Other projects in the City of Orem are also planned and moving forward at various locations throughout the City. For more information, visit www.orem.org or call **801-229-7058**.

Get Informed and Involved

UDOT is committed to keeping the public, interested agencies and other area organizations informed and involved during 800 North construction. To accomplish this, the Department has a public information team dedicated to the 800 North Project. Justin Smart of The Langdon Group is the project Public Information Manager and will be fielding your phone calls and emails throughout construction. You are welcome to contact the 800 North Public Information Team to ask questions or share your concerns.

Sign up for Project Email Updates

During the 800 North Project, the Public Information Team will be distributing regular updates by email. If you are interested in receiving these updates, send a request to jsmart@langdongroupinc.com.

Community Coordination Team

UDOT is forming a Community Coordination Team (CCT) to represent various community interests. Residents, business owners, emergency services, the City of Orem, and local schools will all be represented on the CCT. The CCT members will meet once a month to bring the community's perspective to the project team and then take project information back to their various stakeholder groups. For questions regarding the CCT, please contact Justin Smart using the information above.
